## 11. Evaluation Schedule 3: Approach paper

The approach paper must respond to the scope of work (reference: C3 Scope of work).

As the contents of a proposal give a clear first-hand impression about the capability of the tenderer, the tenderer is expected to submit an organized well-written proposal (approach paper on methodology in achieving the project goal). File separators or section dividers must be used for each of the chapters and annexures **not more than 30 pages (but not less than 10 pages) using font Arial regular 11 points having margins at each side no less than 2,54 cm and line spacing no less than 1,15.**

The approach paper must contain at least the following:

**Table of Contents:** Listing of contents of the approach paper with page numbers and references to annexures.

**Executive Summary:** A brief summary of the whole contents of the approach paper;

**Approach:** Detailed approach that the tenderer feels best to deliver the intended services for the Project with identification of tasks, for each of the activities/ deliverables as have been foreseen in 'Part C 3.1 Scope of work', detailing at least the following:

1. Methodology to be adopted;
2. Project implementation schedule (Activity, task and sub-tasks to achieve the deliverables);
3. A schedule detailing their activity and task inputs, period and organogram(s) for the proposed project team and their responsibilities;
4. Identified project implementation Risks and Risk Management proposals;
5. Quality control mechanisms to be adopted for project deliverables;
6. Stakeholder identification, management and reporting mechanisms to be followed.

The scoring of the approach paper will be as detailed hereunder:

Evaluating Point	Assessment Criteria	Maximum allocated point(s)
<b>Approach Paper</b>		<b><u>20 points</u></b>

## ACCEPTANCE

By signing this part of this Form of Offer and Acceptance, the *Employer* identified below accepts the tenderer's Offer. In consideration thereof, the *Employer* shall pay the Service Provider the amount due following the *conditions of contract* identified in the Contract Data. Acceptance of the tenderer's Offer shall form an agreement between the *Employer* and the tenderer upon the terms and conditions contained in this agreement and in the contract that is the subject of this agreement.

The terms of the contract, are contained in:

**Part C1** Agreements and Contract Data, (which includes this Form of Offer and Acceptance)

**Part C2** Pricing Data

**Part C3** Scope of Work

and drawings and documents (or parts thereof), which may be incorporated by reference into the above-listed Parts.

Deviations from and amendments to the documents listed in the Tender Data and any addenda thereto listed in the Returnable Schedules as well as any changes to the terms of the Offer agreed by the tenderer and the *Employer* during this process of offer and acceptance, are contained in the Schedule of Deviations attached to and forming part of this Form of Offer and Acceptance. No amendments to or deviations from said documents are valid unless contained in this Schedule.

The tenderer shall within two weeks of receiving a completed copy of this agreement, including the Schedule of Deviations (if any), contact the *Employer's* agent (whose details are given in the Contract Data) to arrange the delivery of any securities, bonds, guarantees, proof of insurance and any other documentation to be provided in terms of the *conditions of contract* identified in the Contract Data. Failure to fulfil any of these obligations following those terms shall constitute a repudiation of this agreement.

Notwithstanding anything contained herein, this agreement comes into effect on the date when the tenderer receives one fully completed original copy of this document, including the Schedule of Deviations (if any). Unless the tenderer within five working days of the date of such receipt notifies the *Employer* in writing of any reason why he cannot accept the contents of this agreement, this agreement shall constitute a binding contract between the Parties.

#### C2 PRICING DATA

##### C2.1 PRICING ASSUMPTIONS

###### PREAMBLE OF THE PRICING SCHEDULE

1. Pricing Assumptions forms part of the contract documents and must be read in conjunction with all the other documents comprising the tender documents.
2. The Tenderer has to quote prices against each of the items of price lists (C2.2: Pricing list) covering all services as deemed required for the successful completion of each of the items.
3. The tenderer has to reach a total cost of each of the deliverable (as explained in Section C3: Scope of works) to arrive at the project cost; these costs are inclusive of all activities costs and VAT. No other costs, under any circumstances, would be payable against accepted completed deliverables.
4. Expenses costs will be paid according to the latest Rates for Reimbursable expenses published on [www.publicworks.gov.za](http://www.publicworks.gov.za). Service Providers will be reimbursable based on actual cost for only for the professionals listed in the Evaluation Schedule 2. All travel shall have to be according to the requirement of the project and approved by the Project Manager prior to actual travel. Travel expenses item in the Activity Schedule include VAT.
5. The tenderer has to submit, together with the tender, details of the quoted total cost using the table given in **Annexure A: Breakdown of Costs of Quoted Price**. Each of the deliverables has to be cost detailing of activities showing personnel input and rate, showing all possible cost inclusive of all taxes (except VAT) to be incurred by the tenderer in executing the project, staff, administration, profit margin, etc. showing rates, quantities and total amount. This is to justify the tenderer's tendered price.
6. The tenderer has to submit, together with the tender, details of the quoted total cost using the table given in Annexure A: Breakdown of Costs of Quoted Price. Each of the deliverables has to be cost detailing of activities showing personnel input and rate, showing all possible cost inclusive of all taxes (except VAT) to be incurred by the tenderer in executing the project, staff, administration, local travel and subsistence, accommodation, profit margin, etc. showing rates, quantities and total amount. This is to justify the tenderer's tendered price.
7. The quantities may increase or decrease according to the actual need of the project wherever quantities are provided except those items with 'Lump Sum' units.

8. All items on the Price List must be priced.

Tenderers must note that in case of a successful tenderer offering discount, the offered discount will remain in force for the full duration of the contract and no negotiations to adjust the discount will be entertained under any circumstances.

9. The Tenderers may be asked for time-based work on activities identified during the execution of the project in addition to the priced items, which will be deemed necessary by the Project. **The cost of the engagement shall be determined based on the personnel rate given by the Tenderer in arriving at a price for the tender and be paid out of the provisional sum provided in the price schedule.**
10. All rates and sums of money quoted in the 'Price list' shall be in South African Rand and whole cent. Fractions of a cent shall be discarded.
11. Tenderers should take note that payment will be only based on **acceptable completed activities** on production of appropriate tax invoice(s). Any payment claimed as part completion of an activity may be considered if the completion of work is acceptable and does not influence the completion of the rest of activities at agreed pro-rata with the Project Manager.
12. Tenderers should submit a cash flow projection for the whole project aligned with implementation schedule for completion of each activity (clause 31,1 of NEC 3, PSC) taking into account the *starting date* and *completion date* (ref: C1.2 Tender data), which will be adjusted at inception with the agreed Project Implementation Plan (PIP).

### C2.2 PRICING LIST

1. Costs incurred by the *Tenderer* other than the listed expenses are assumed as included in the Rates and Prices quoted. If expenses are paid at cost, then 'at cost' should be entered into the Rate column.
2. The rates provided in the table below must be all-inclusive, i.e. inclusive of any support staff and administrative staff and associated costs; and disbursement costs. That means, MISA will not entertain any additional claims for support- staff, administrative staff, or disbursements.
3. Tenderers must note that the offered discount will remain in force for the full duration of the contract and no negotiations to adjust the discount will be entertained under any circumstances.
4. Evaluation of the "cost" portion of the tender will take into account both the total price and the rates for individual team members and their proposed input in completing a task. The basis will be the tenders' detailed cost breakdown according to item 5 of the above section C2.1 Pricing Assumptions. The tenderers are advised to use the template given in **Annexure A** for their detailed costs break down.
5. The prices should be fixed for the contract period.

#### C2.2.1 THE PRICING SCHEDULE

A tenderer has to quote all of the items of the pricing schedule. The

Client makes entries in the first four columns.

For each row:

1. If the *Tenderer* is to be paid an amount for an item that is not adjusted if the quantity of work in the item changes, the tenderer enters the amount in the Price column only.
2. If the *Tenderer* is to be paid an amount for an item of work, which is the rate for work multiplied by the quantity completed, the tenderer enters the rate, which is then multiplied by the expected quantity to produce the Price, which is also entered.

Costs incurred by the *Tenderer* other than the listed expenses are included in the Rates and Prices and the *staff rates*. If expenses are paid at cost, then 'at cost' should be entered into the Rate column.

## Cooperative Governance & Traditional Affairs

Reference no.: MISA/NC/LIC/009/2022/23

APPOINTMENT OF A PROFESSIONAL SERVICE PROVIDER FOR THE DESIGN AND MANAGEMENT OF A LABOUR INTENSIVE CAPACITY BUILDING PROGRAMME IN MISA AND SELECTED MUNICIPAL INSTITUTIONS IN THE NORTHERN CAPE PROVINCE.

### C3 SCOPE OF WORK

#### C3.1 BACKGROUND, INTRODUCTION AND PURPOSE

Due to the COVID-19 pandemic and related lockdown of economic activities since late March 2020, the President of South Africa announced an economic recovery stimulus package on the 21<sup>st</sup> April 2020, to stimulate the economy and counteract job losses, including the creation of work opportunities in the municipal infrastructure sector, for the short, medium and long term.

An amount was approved for the Department of Cooperative Governance (DCOG) to build capacity for the implementation of Labour Intensive Construction (LIC) methods and related support to municipal infrastructure projects.

The capacity building and support will be done and managed through this appointment, while the municipal project construction works will be funded by the particular municipalities from their grant funding allocation and own funds – therefore the appointment of any service provider for the physical execution of the municipal infrastructure projects, will be done by the municipalities.

The purpose of this tender is to procure a programme management consultant organisation, to design and manage the activities and other role player organisations in this capacity building and support programme, including the selected municipalities, their consultants and contractors.

The work includes the creation and sharing of good practices and improvements of LIC on all levels of the programme, with the ultimate goal to increase the labour intensity on each municipal project. This programme must build capacity for LIC implementation in the local government sphere and prepare municipalities to mainstream LIC capacity for projects, on policy level.

This programme and appointed programme management consultant will work initially with a planned fifteen (15) pilot municipalities, but ultimately aims to:

1. include all local and district municipalities that receive grant funding for capital infrastructure projects, or grants for the creation of infrastructure-related work opportunities, i.e. in all forty-four (44) districts of SA
2. prepare all role players in the municipal infrastructure environment - to mainstream the LIC improvements throughout the relevant organisational policy and implementation frameworks ensuring continuation of LIC approach at all - including Metro Municipalities
3. work across the whole of South Africa
4. continue this programme for a few year period, e.g. three (3) years, i.e. 36 months
5. hand over the completed work to the relevant stakeholders / role players, to continue utilising the established capacity, and related activities for further sustaining capacity

building and creation of work opportunities after the end of termination of this programme appointment.

6. relate the work to, and cooperate with; a similar appointment, of a research institution team – responsible with the capturing of good practices, methods, policies, activities and research, to develop and upgrade existing and create new improved LIC policy, guidelines, methods and practices in South Africa.

The work of this programme will include the following:

1. assist municipalities and all relevant stakeholders and role players to improve labour-intensity in the implementation of municipal infrastructure projects
2. work will relate to both capacity building, and management assistance for practical implementation of construction projects
3. selected projects must be related to roads (and related storm water), water and sanitation
4. the projects may include both capital or operational work, both new infrastructure creation or work related to maintenance, refurbishment, upgrading or replacement of existing infrastructure
5. the projects must be executed within the context of utilising the existing municipal conditional grants allocated to municipalities as implementing agents for these projects, e.g. mostly from the municipal infrastructure grant (MIG).
6. prepare and establish the LIC methods as a mainstreamed choice and competence of the municipalities' use of the MIG funding in the industry of municipal infrastructure construction. establish the standardization of LIC method and focus in municipal policy, to enable LIC in other grant funding programmes, e.g. INEP, WSIG, etc

The stakeholders and role players in the municipal infrastructure work environment for whom capacity must be developed and who may be involved in the practical implementation of projects, include the following groups:

1. Those in a governance / managerial position:
  - Municipalities – including Council, the municipal manager and directors, and key relevant personnel tasked with engineering or project management of infrastructure work
  - MISA - relevant personnel (training will be done by others)
  - Provincial Governments – relevant personnel working with infrastructure grant management or municipal infrastructure
  - National Departments of Cooperative Governance, Public Works, Water Affairs and others - relevant personnel to be confirmed
2. Those responsible for the execution of capacity building work, together with the programme management consultant (this appointment):
  - The appointed programme management consultant (procured by this tender)
  - Any sub-consultant (if any, nominated or not) to assist with the capacity building and support programme. This includes the MISA-framework consultants already appointed by MISA in each district across SA, for the supply of professional engineering services related to roads, water and sanitation. Other sub-consultants may include professional service providers (PSP's) for the LIC training, for social community facilitation services, or ICT specialists for the upgrading of the national EPWP and LIC reporting system.
3. Those responsible for doing the engineering and construction work on site at municipalities:
  - PSP's appointed by the municipalities for the infrastructure projects, including;

- professional design engineers or consultants, site supervisors or;
- construction management consultants, contractors or;
- groups of labourers or individuals selected / appointed from the communities through accepted municipal methods

4. The communities and beneficiaries:

- Community members benefitting from the project and,
- communities from where labourers are selected for the physical work on site.

Labour intensity is the ratio of rand-value of labour opportunities made available on each project compared to the total project rand value.

The higher the labour intensity, (i.e. the higher this ratio of work by hand, instead of machines) – the higher would be the number of labour opportunities created per project, and the more efficient the utilisation of funding would be for the creation of labour opportunities on infrastructure projects.

The main characteristic of LIC is that labourers work and are paid for completing a defined piece of day-work, instead of being paid per time-period, e.g. day or week.

The Municipal Infrastructure Support Agent (MISA) has the mandate to build and improve capacity in municipalities for infrastructure development and improvement of technical service delivery.

MISA was appointed by DCOG to work with key stakeholders to devise mechanisms for a programmatic and structured approach, including intervention activities through which to improve the ability of municipalities and their local government stakeholders – to implement optimised labour-intensive construction (LIC).

Problem Statement:

The current implementation of grant funding for the creation of municipal infrastructure, especially the MIG is aiming at eradicating service delivery backlogs – include the objective of creating local unskilled labour opportunities on each project in the grant conditions. However, the numbers of such opportunities created across the country, is not enough, the labour intensity is not optimised and it can be increased dramatically in order to create work opportunities for a stronger economy, now and in the future.

Although labour-based construction is implemented – mainly on portions of projects – very few true labour-intensive construction (LIC) projects are implemented, with the result that the labour intensity and several possible labour opportunities are not optimally utilised. This is a result of the fact that national LIC policy is not fully implemented, but also due to lack of capacity throughout the construction industry, e.g. at the municipal clients, consulting engineers and construction contractor firms.

The labour opportunities created through recent and existing projects are also not reported, or not reported adequately, which creates a current perceived and/or real under-performance and lack of data and information.

There is a need to implement good practices for LIC and also to capture and document additional good practices for the improvement of LIC implementation across the country.

Objective and Purpose of this Tender:

MISA's objective with this LIC capacity programme, is to update and enhance the guidelines, frameworks, structures (if required) and industry-wide understanding of LIC, with the result to build capacity for LIC in the local government sphere and at municipalities for municipal infrastructure projects, especially those utilising MIG funding.

The management consultant will be supported by MISA in the rollout of LIC Guidelines for infrastructure planning, funding, execution, operations and maintenance. Reference must be made to existing guidelines of EPWP and ensure all updated documentation to be used in the municipal environment.

The aim is to establish planning, designing and implementation of more infrastructure projects incorporating optimal use of labour-intensive techniques.

The improved guidelines on labour-intensive construction (LIC) and / or the Expanded Public Works Programme (EPWP) must provide a means to regulate the utilisation of LIC techniques on all grant-funded infrastructure projects in municipalities to significantly contribute towards creation of work opportunities in municipal construction projects.

The existing data capturing and reporting systems on labour-based and labour-intensive infrastructure components of projects must be improved and managed effectively on a monthly basis, e.g. with data and information at least 95% accurate and complete.

The appointment by this tender would be for one (1) year (12 months) only, with the option to extend it.

The purpose of an LIC Capacity Building Programme is to extend over three (3) years (36 months), to improve and optimise labour-intensity on municipal projects at municipalities in all of the 44 districts of South Africa.

A summary of outputs and outcomes are as follows: Table

of Outputs and Outcomes:

Outputs (Deliverables)	Outcomes (Impact)
Obtain information and update knowledge and do research where required – for the compilation and enhancement of the body of knowledge related to the creation of labour-intensive work opportunities.	Update and enhance the best practices, norms and standards, as well as all required activities - for labour-intensive implementation of projects in the municipal and local government sphere.
Delivered practical LIC training or refresher courses to municipal officials and other persons working in the field of municipal support and execution of grant-funded projects in the local government sphere, to share knowledge and prepare individuals for the implementation and execution of high labour intensity projects	Increase the level of understanding and competence of all relevant municipal staff, individuals of appointed professional service providers including consultants and contractors – to effectively implement the required knowledge of labour-intensive work on various projects in the local government sphere and at municipalities.
Improve the current reporting activities at all local government institutions receiving grant funding which includes the requirements of creating work opportunities, including augmentation of the staff component and capacity required to do the reporting, e.g. through facilitating the appointment of additional data capturers.	Increase capacity at municipalities and their appointed professional service providers (PSP's) for the reporting of work opportunities created on capital infrastructure projects and other grant-funded projects, to ensure effective, efficient and economic reporting.
Report all labour opportunities completely and accurately and improve the reporting procedures, framework and system so that reporting is effective, quicker, accurate,	Create a clean set of data of work opportunities created in the past, with complete and accurate actual data and information as new report.

easier, and linked to the procedures of other grant funding and conditions, in addition to the EPWP grant framework.	The new report and reporting framework and procedures must be in line with the grant requirements.
Update and enhance the regulatory framework for the creation of work opportunities of grant funding programmes which include the conditions related to work opportunities.	Create and improve a well-structured system of regulations, guidelines and enforcement for the effective creation of LIC projects and related work opportunities, to high practical labour intensity according to practical and tested norms and standards for LIC work.
Facilitate the design and implementation of labour-intensive projects for the creation of a maximum number of additional work opportunities on projects, including the assistance to municipalities to identify and develop projects into LI projects, assisting pilot projects in each Province of South Africa, ensuring that all best practices are followed, and assist with the completion of the projects while analysing the challenges, the norms, standards and possible recommendations to enhance LI projects	Ensure that all updated body of knowledge of LI including norms standards and best practices are tested on implemented projects during a process of skills and knowledge transfer and capacity building at selected municipalities.

### C3.2 GENERAL REQUIREMENTS OF THE TENDERER

In order to do the LIC development work, the services of a consultant is required, who do have SAQA-accredited labour intensive training, appropriate LIC experience, who may be a service provider as well, and able to have the abilities to fulfil the requirements of a management consultant. The management consultant may appoint sub-consultants, especially to enhance geographical representation in municipal areas across the country. The management consultant must be able to fulfil all work required to facilitate, support and manage the programme.

The management consultant would have to have experience and expertise related to the following:

- Able to illustrate strong project and programme management abilities
- Knowledge of the municipal infrastructure sector
- Engineering and construction work experience - related to all municipal services
- LIC Training or received training already
- LIC project implementation experience
- Administrative and management responsibilities - including communication and reporting
- Development and detail design of projects including LIC projects
- Executing and Supervising of projects throughout all lifecycle steps

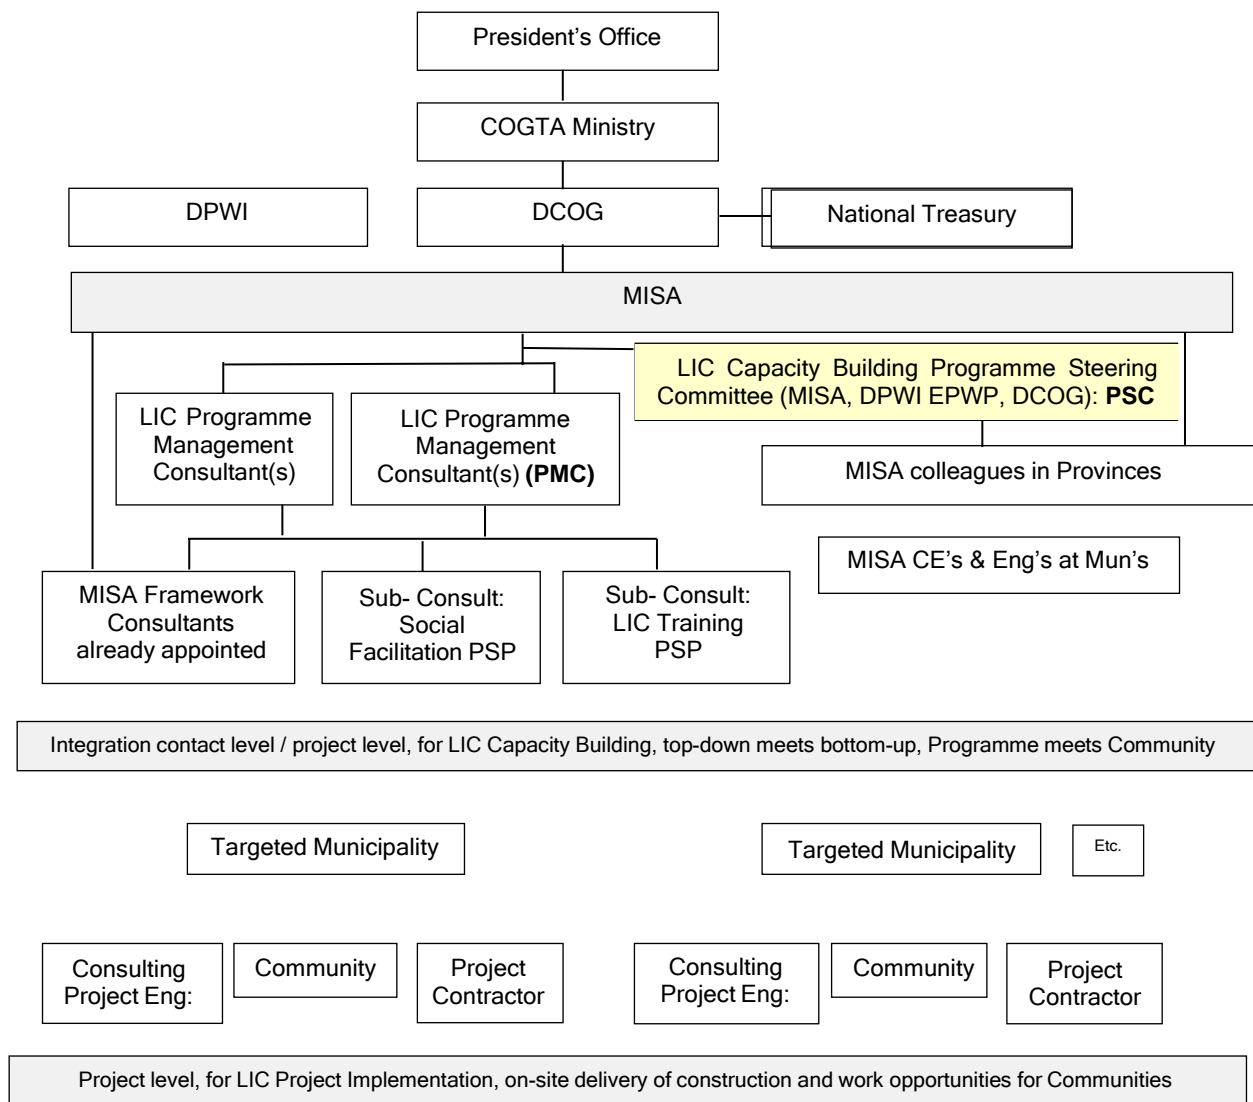

Each tenderer must be able to provide an Activity-Cost-Time Schedule including the following information for each planned process and task:

- Method statement
- Resource allocation
- Duration of tasks / processes
- Duration and cost of each resource
- Cost summary per task and per municipality
- Planned cash flow

### C3.3 PROPOSED PROGRAMME STRUCTURE

The following schematic drawing illustrate a proposed programme management structureshowing the lines of communication and reporting.

Proposed Programme Structure:

Notes applicable to the above Structure:

1. The structure is an indicative layout only and the real work structure may be different as long as the required work deliverables are achieved.
2. The MISA client stakeholders include the:
  - National Departments of DCOG, DPWI and NT
  - Provincial Departments involved with municipal infrastructure, e.g. Provincial Departments of Local Government / Cooperative Governance, Public Works and other line Departments, e.g. Water Affairs, Transport, etc.
  - All the municipalities (local and district) that are doing municipal infrastructure project, whether they are currently assisted by MISA's services (i.e. "clients" of MISA) for capacity building, or not. Initially, it would only be the MISA-assisted pilot

municipalities, i.e. fifteen (15) of the municipalities with capacity challenges. The chosen fifteen would have medium capacity and ability to respond to this LIC Capacity Programme

- The communities in the municipalities who are the ultimate beneficiaries of this programme. Initially, and for this whole Programme, only certain communities would be beneficiaries.
3. The LIC Capacity Building Programme, Management Steering Committee, i.e. the Programme Steering Committee (**PSC**), will be responsible for the overall Programme Management of this LIC Programme and management of the Programme Management Consultant. All reporting will be presented to and shared with the PSC.
  4. The same PST will also be responsible to manage a related Programme, i.e. for the **Study and Documentation of all LIC Practices and Improvements and Updating of SA Guidelines, for which a Research Institution would be appointed.**

The Programme Management Consultant (**PMC**) and **Research Institution** will work closely together as part of the responsible tasks of both – to obtain, test, analyse and share data, information, improvements and good practices for the research components of LIC capacity building.

5. The above structure illustrates two (2) Programme Management Consultants (PMC's) – however, it is a schematic layout and it provides for the flexibility of MISA to possibly appoint more than one PMC if required, depending on the details from the tenders received and proposed geographical representation, etc.
6. Tenderers must indicate and confirm their ability to work in each Province and must indicate any areas included in their tenders.
7. The Programme Management Consultant (PMC) may create a joint venture or appoint sub-consultants (nominated by the client or not) to ensure geographic representation across SA and / or to enhance the functional expertise, for the:
  - LIC and / or construction training services
  - social facilitation and / or community liaison services
  - professional services required for the upgrading of the EPWP and LIC reporting system - including database designers and IT programming specialists
  - professional engineering services to assist the Municipal Consultants with the management of LIC aspects of the design and documentation of project work
  - professional engineering services to assist the Municipal Contractors with the management of LIC aspects of the project(s) construction, LIC site supervision and the planning and implementation of piece work and other construction on site.
  - other consulting services

Appointment of any sub-consultant requires due processes of MISA, MISA's approval, consent and confirmation prior to appointment.

It would be necessary to include relevant individuals in the assessment to verify their capacity and training requirements for this Programme – as required by the client, and advised by the Programme Management Consultant.

8. MISA have Professional Consulting Engineering companies appointed on framework contracts, covering all the districts across the country. These consultants are appointed for professional consulting services of either one or both:
  - Water & Sanitation
  - Roads (and storm water)

The MISA Framework Consultants (**FC's**) are appointed to represent all districts and

therefore all local municipal areas.

The FC's may be utilised on the Programme to extend the services of the PMC, e.g.:

- ensure local geographical representation across SA
- do on-site LIC and / or construction capacity building work, e.g. training or community facilitation (or only facilitating it), assisting the consultant or contractor, or assisting the municipal staff

In order to utilise FC's appointments - it would be necessary to include relevant individuals in the assessment to verify their capacity and training requirements for this Programme - as required by the client, and advised by the Programme Management Consultant.

For the Framework Consultants selected for this Programme – relevant capacity building will be included in the Programme to ensure that all service providers (sub-consultants) would be able to render their professional services to an acceptable required level of expertise.

The client will assist in providing names and contact details of the FC's, who could be regarded as nominated sub-consultants of this Programme, although they are already appointed by MISA for professional engineering services.

9. On the Integration Contact level with the municipalities – certain Provincial Department and other organisations would be involved, depending on the selection of the projects, e.g. for a sport infrastructure project, the relevant sport departments would be involved.

The relevant individuals of the municipalities and other organisations, should be regarded as stakeholders or responsible role players of this Programme. The client will assist in providing names and contact details where required.

It would be necessary to include relevant individuals in an assessment to verify their capacity for this Programme and will be included in the LIC capacity building activities, e.g. LIC training, to ensure that all would be able to understand and ensure work to an acceptable required level of expertise for this LIC Programme.

10. On the infrastructure project level, the municipalities utilise their own funds and grant funding to implement the municipal infrastructure projects. As per the MIG grant conditions, selected projects have to adhere to the grant requirements for approval, prior to implementation. The application of LIC methods is one of the latest MIG conditions to ensure that a certain percentage of the annual MIG funding is applied towards LIC implementation.

The municipalities would appoint their own professional service providers (PSP's) for the projects in line with municipal supply chain procedures, i.e.:

- Professional engineering consultants for the technical design and documentation in line with LIC and related other professional services.
- Construction Contractors, using relevant documentation in line with LIC methods.

Construction Contractors may include the following:

- Local emerging contractors or established construction companies
- Local emerging contractors appointed on a framework contract for a period of time or certain construction works
- Groups of local labourers, i.e. as labour-only contracts, with the municipalities responsible to do construction management internally or by appointment of a site-management contractor.

On the project level, the relevant individuals of the municipal PSP's must be included in an assessment to verify their capacity for this Programme as required. The PSP's will be included in the LIC capacity building activities, e.g. LIC training, to ensure that all PSP's would be able to produce their services on the projects, to an acceptable required level of expertise for this LIC Programme.

- The communities and unskilled labour is the ultimate client and beneficiary of this programme. Capacity building is required on the project level, to create a sustainable environment for LIC, where projects can be done to LIC methods now, and in the future.

The PMC must assist municipalities in developing the best local methods to select labourers for project. The labour component of the LIC project must be included in a simple assessment to verify their capacity for this Programme as required. The labourers will receive the required LIC and on-site construction training as required.

### C3.4 STAKEHOLDERS & MANAGEMENT

The following stakeholders have been identified as critical to the successful implementation of the programme

#### List of Stakeholders

Stakeholder	Roles and Responsibilities
<b>COGTA</b>	Monitor LIC performance and roll-out by MISA Work hand in hand with MISA to ensure alignment of the MIG framework to LIC work components.
<b>MISA</b>	Oversee the LIC programme rollout and provide technical support to the municipalities.
<b>LOCAL, DISTRICT &amp; METRO MUNICIPALITIES:</b>	Assist DCOG and MISA by supporting project designs (were appropriate) for projects to be implement with a bias to LIC. Lead the social facilitation process and the labour register. Projectimplementers of LIC projects
<b>DPWI</b>	Support DCOG and MISA with technical expertise in the LIC roll-out taking lessons from Expanded Works Programme
<b>SALGA</b>	Support the roll out of the programme across the local, district and the metro municipalities. Represent, promote and protect the interests of local governments and to raise the profile of local government, amongst other objectives.
<b>OTHER PARTICIPATING SECTOR DEPARTMENTS OF THE MIG PROGRAMME</b>	Support and give guidelines on the LIC standards in line with sector specific standards (DWS, Transport, Environment, Sport)
<b>PROVINCIAL COGTA's</b>	Support the program through monitoring and support municipalities with the roll-out of the LIC
<b>NATIONAL TREASURY</b>	Support with compliance to applicable legislations e.g. MFMA, SCM regulations
<b>CIDB</b>	Support the use of LIC and issue standards and thresholds for contractors

The appointment of the management consultant will be with MISA, although reporting is communicated to the stakeholder with the following management responsibilities:

### C3.5 INFORMATION TO BE PROVIDED BY THE EMPLOYER

For tender purposes, the employer will provide required additional information at the compulsory tender briefing meeting, which will be held physically at the MISA head office (for limited attendance by prior arrangement) – as well as electronically available as virtual meeting to all tenderers at the same time.

The employer will supply the following information to the appointed programme management consultant:

- Contact numbers for the stakeholders, MISA staff and relevant National and Provincial colleagues with whom the preparation work and implementation must be facilitated.
- Contact details and general information of the Municipalities that are participating on the LIC Capacity Development Programme.
- Background information regarding the LIC business case and strategic purpose of this work, as well as grant-related documentation, e.g. the latest MIG DORA framework conditions.
- Background documentation, most of which is also available on the internet, e.g. the **“Guidelines for the Implementation of Labour-Intensive Infrastructure Projects under the Expanded Public Works Programme (EPWP), 3<sup>rd</sup> edition, 2015.”**
- Through the National MISA LIC Steering Committee – additional information would be supplied, including the protocols for engagement, e.g. with municipalities and provinces, approach to the work, e.g. using continuous improvement and project management principles and methods.
- The programme management consultant will be introduced to the Research Team responsible for the capturing of good practices and updating of guidelines.

The employer’s task team(s) will be able to facilitate engagements and represent the client with the programme management consultant where necessary on all levels, including at the municipalities.

### C3.6 PROPOSED PROGRAMME TIMEFRAME

**This project planned timeframe and appointment is for 4 months, with the possibility to be extended (with additional appointment).**

The purpose of a planned LIC Capacity Building Programme is to extend over three (3) years (36 months), to improve and optimise labour-intensity on municipal projects at municipalities in all of the 44 districts of South Africa.

An indicative breakdown of a one-year project period is supplied below:

Programme Year 1 (Phase 1)				Programme Year 2	
Dates (in 2022 / 2023)	Oct - Nov	Dec - Jan	Feb - Mar 2023	Apr - June 2023	July - Sept 2023
Quarterly periods (3-month):	1	2	3	4

Process 6				Close-Out & Hand-over	
Phase 2: Process 1:(and following phases)				Renewal of Initiation & Inception	
Phase 2: Process 1:(and following phases)				Project Preparation & Implementation re-Planning	

Notes applicable to the above Table:

1. The table is an indicative example only and the real work may follow different processes as long as the required deliverables are achieved.
2. Municipal financial years are from 1<sup>st</sup> July, until 30 June. For the utilisation of MIG funding for an LIC project – all MIG-project approvals, LIC community preparation, planning, design and documentation must be done according to LIC principles, prior to the physical on-site construction implementation and LIC-projects may be regarded as multi-year projects.  
The LIC community preparation includes the liaising with the benefitting communities including the unskilled labour in the community. For most projects, information from communities must be used for the project design and awareness training must be done to labourers, CLO and the relevant municipal councillor.
3. The closeout and hand-over of the work created must include required training and a planned exit strategy to leave behind a sustainable process.

## **C3.7 PROCESSES, TASKS AND DELIVERABLES**

### **C.3.7.1 PROJECT INITIATION & INCEPTION**

#### **DELIVERABLE 1:**

1. Confirm client requirements, project brief, objectives, priorities, constraints and preferences, engage in programme initiation meeting and consultation with the client or client's authorized representatives on matters relating to Labour Intensive Construction or Expanded Public Works Programme and assist in developing a clear project brief
2. Refine user needs and options, consult with Department Public Works & Infrastructure and EPWP and all relevant stakeholders in the planning, design and implementation of labour-intensive construction projects in the targeted municipalities
3. Participate in creating the structures and Programme Steering Committee (PSC)
4. Assess and refine scope of work and required resources - verify functional and geographic representation. Identify options for appointment of sub-consultants if required - liaise with MISA prior to appointments.

#### Required Deliverables.

- Agreed services and scope of work
- Submission of required documentation, e.g. the Inception Report and Project Implementation Plan (PIP)
- Signed agreements
- Initiation of the appointments of sub-consultants, if required
- Collation of available information on infrastructure projects, status quo and extend of LIC implementation in target municipalities
- Reporting on assessment of existing data capturing and reporting capabilities including resources and tools available at target municipalities
- Reporting on training requirements and other relevant technical and non-technical matters about municipal and other officials working with LIC infrastructure projects
- Reporting on outcomes of engagements with relevant sector departments on rolling out of the LIC capacity-building programmes in municipalities. Report to include aspects of the existing social facilitation set-up
- Baseline Programme Implementation Plan for long-term plan to ensure sustainable improvement of LIC capacity, with recommendation on good practices for the future, etc.

- Minutes of meetings and required formal reports, e.g. weekly and monthly

### **C.3.7.2 PROGRAMME PREPARATION AND PLANNING**

#### **DELIVERABLE 2:**

1. Do assessments and investigate to verify data and information, do gap analyses on the following, and obtain details for status quo reports, including recommendations to improve or renew the following:
  - The current EPWP data capturing and reporting system, including the level of reporting data and information, capacity on all levels, operational work flow processes and utilisation of available tools and other resources. Identify all needs to upgrade the system and tools, as well as to include for LIC reporting
  - the availability, level of expertise and compliance to requirements of LIC training providers in all areas
  - the available social facilitation consultants in all areas of targeted municipalities
  - the current LIC knowledge and skills of relevant persons on all levels of the programme including officials and service providers - compile report on all training needs
  - the current capacity for LIC projects at the targeted municipalities - including:
    - status of projects identified (capital infrastructure or operational maintenance work)
    - general capacity to implement the LIC projects
    - any special needs required to facilitate the implementation of the LIC projects
2. Refer to the currently available LIC or EPWP guidelines and other documentation to ensure best compliance and identify areas for possible improvement – communicate and share it with PSC as input to the work of the Research Team
3. Identify additional sub-consultants (if any) to be appointed for professional engineering work, social facilitation, LIC training and construction training. Verify possibilities for appointment of sub-consultants and appoint where required.
4. Prepare and refine concepts for implementation and roll out the programme following the brief, including project scope, scale, character and form. Incorporate certain principles such as continuous improvement to ensure continuous updating of planning with new or improved items e.g. update the PIP when required.
5. Formulate and finalise accredited training programmes to build sustainable LIC capabilities on all levels of the programme
6. Consolidate all status quo and conditional assessments and link it to PIP. Evaluate and report the implementation readiness of each item and requirements for implementation of the PIP of the LIC Capacity Building.
7. Produce / update PIP and other documentation for rollout of the work and discuss with the PSC.

#### Required Deliverables.

- Status Quo Reports on all aspects of the work
- Concept and recommendations for the upgrading and improvement of an EPWP and LIC Reporting System, including solutions for improvement of data management, reporting capacity and IT databases
- Detailed Terms of Reference and procedures for the following work (including appointment of sub-consultants if required):
  - Social facilitation
  - Accredited LIC training programme
  - Restructuring of reporting system
  - Required training and recruiting strategy (if required) for data capturers in the

- reporting system
  - Creating of database for reporting system
- Revised PIP
- Minutes of meetings and required formal reports, e.g. weekly and monthly

### **C.3.7.3 TRAINING FOR LIC**

#### **DELIVERABLE 3:**

1. Undertake the training according to the appropriate NQF level of identified individuals on all levels, starting with highest priority individuals, e.g. technical managers at municipalities. Training material and practical implementation must be included in the training. Training must include practical implementation.

(The number of candidates will be confirmed; for the purpose of this tender the number must be assumed to be 50.)

2. Monitor and evaluate the roll-out of the LI Capacity development on all levels due to training - continuously update the gaps
3. Guide the trained municipal and MISA officials in the review of planned projects and assist with guiding the creation of the designs and documentation according to LIC principles
4. As soon as construction phases are reached - ensure on-site construction training

#### Required Deliverables.

- Trained data capturers
- Trained labourers on sites, ready for construction
- Trained and qualified officials and other relevant persons, e.g. consultants, to NQF level 5 or 7.

### **C.3.7.4 IMPLEMENTATION OF LIC PROJECTS & CONTROL**

#### **DELIVERABLE 4:**

1. Facilitate and assist each target municipality with the project prioritisation and selection for LIC implementation.
2. Execute an awareness campaign to improve awareness of LIC requirements at municipal council level and in communities
3. Facilitate and assist each target municipality with the project prioritisation and selection for LIC implementation, utilising municipal MIG funding and processes. Projects must be related to any of the following: roads, storm water, water and sanitation.
4. Assist the municipality to optimise the procurement and scope of work to ensure maximum utilisation of LIC principles, e.g. to divide the total project into ideal packages for the accommodation of appointment of local contractors.
5. Assist the municipality with the different possible ways of procurement for the work, e.g.:
  - As normal advertised tender for a contracting company
  - As labour-only tender
  - As tender for supply of materials and construction supervision only
  - As municipal internal project with combinations of labour-only and construction supervision, etc.
6. Facilitate the assistance of the municipal-appointed professional engineer, to ensure that:
  - the design work and documentation is done according to LIC methods and principles
  - that the procurement processes adhere to the municipality's requirements and in line with LIC principles

- tender evaluation (if any) is done according to the normal municipality's requirements and in line with LIC principles, i.e. that contractors tender for work according to an LIC bill of work quantities and LIC methods
7. Facilitate social and community participation services including the following:
    - Drawing up and confirming a Communication Plan
    - Set up and obtain buy-in from community with representative structure, including the councillor, beneficiary liaison committee, CLO and others
    - Set up and sign a Community participation Compact as contract with the community. The Compact must include all items to be agreed on including the construction products and must stipulate the tasks an offering of the communities.
    - Setting up a Project steering committee or ensuring that MISA PSC will be the structure for progress and management at the municipality
    - Do continuous progressive communication and meetings with community to keep all involved and to solve any problem the moment it appears - communicated by CLO's.
    - CLO's must be appointed through approved municipal procedures, by the communication consultant
    - Induction must be done of labourers and contractors especially site agents
    - The communication consultant should be a trusted partner for the community - to channel all complexities and solve problems continuously
  8. Develop the opportunity and facilitate assistance to contractors for proper LIC pricing and setting out of work after appointment
  9. Facilitate LIC training for contractors / site agents / construction supervisors and resident engineers, etc.
  10. Participate on project level throughout the normal implementation of the project, with consultant and contractors.

#### Required Deliverables.

- Effective implementation of chosen LIC project with all relevant role-players on board
- Reports illustrating successes of social facilitation, LIC training, construction training, training of data capturers, any other required training
- Capturing and sharing of all relevant good lessons and practices learnt
- Progress Reports, minutes of meetings
- All required reporting to the Programme Steering Committee (PSC)
- Continuous capacity building activities of relevant municipal staff, construction labourers, consultant and construction contractor, to ensure highest value and quality of LIC project implementation, throughout all required lifecycle processes, including the capturing, and sharing of good practices.

### **C.3.7.5 UPGRADING EPWP & LIC REPORTING SYSTEM**

#### **DELIVERABLE 5:**

1. Implement solutions (as approved by MISA) to address data capturing, information management and reporting on existing and new reporting platforms
2. Improve reporting systems to include smart geo-referencing to capture LI opportunities and project areas information. Furthermore, improvements should make the uploading of data easier and also strengthen monitoring and progress measurement capabilities
3. Develop solutions to address data capturing, information management and reporting on existing reporting platform
4. Monitor and evaluate the performance of the LI reporting system and measure progress against targets set

Required Deliverables.

- Upgraded operations for reporting to ensure complete, accurate and timely capturing of relevant data related to LIC and EPWP work opportunities and projects at municipalities
- An upgraded database tool with geo-referencing abilities to capture data, e.g. through utilising a smart phone logger with databased application for capturing information on-site.

- The system must incorporate the electronic on-site and off-site capturing of data and information, the uploading onto an off-line and on-line reporting database and the creation of required exception reports in electronic format.
- Training of all data capturers and relevant persons, for the use of the system must be part of the work

### **C.3.7.6 CLOSE-OUT & HANDOVER**

#### **DELIVERABLE 6:**

This process aims to fulfil and complete the project closeout including necessary documentation to facilitate effective completion, handover and instilling improved LIC and EPWP operation. For each phase of the LIC Capacity Building Programme, e.g. for each year of appointment of m this close-out would be regarded as an interim close-out of work

1. Prepare project close-out report documenting all key aspects of the project including lessons learnt,
2. Prepare project records of all payments, project financial information, minutes, progress reports and final accounts,
3. Finalise framework or guideline documents developed under the project for handover to the client and benefitting municipalities,
4. Undertake final official handover engagement

#### Required Deliverables.

- Report on the LIC capacity created, with focus on proving the work abilities to implement LIC infrastructure projects at the targeted municipal level
- Project Close-out Report and files
- Final framework or guideline documents
- Training reports and certificates for participants
- Final accounts

### **C.3.7.7 REQUIRED PROGRAMME REPORTING – ALL STAGES**

#### **DELIVERABLE 7:**

This section provides for the continuous progress reports, minutes of meetings and following of n progress, and reporting of all work including the work opportunities created.

The following reports and plans need to be generated and submitted by the appointed management consultant in agreed formats:

1. An Inception Report, Project Implementation Plan (PIP) complete with time schedules, budgets, resources and a planned activity-cost schedule- must be submitted within three (3) weeks after the appointment of the programme management consultant(s).
2. A Project Implementation Plan (PIP) must be submitted prior to the signing of the contract with the appointed programme management consultant(s). This PIP must indicate the details of the planned implementation of the required work.
3. Contract Closeout report to be submitted in draft, at least four (4) weeks prior to the contract end date.

The following recurring reports would be required from the management consultant(s):

1. **Weekly Programme Management Progress Reports** – only during the first month, focussing on the following:

- Listing the activity tasks items achieved - linked to the PIP
- List the challenges experienced which requires urgent attention and / or assistance if any - linked to the PIP

2. **Bi-Weekly Municipal Progress Reports** must be compiled from local information supplied, to indicate progress and status of the project preparation and other related activities at the target municipality.

The report should include inputs from each relevant role player, i.e. the responsible MISA engineer, the officials from the Provincial Departments, the municipal PSP's after their appointments (both consultant and construction supervisor / site agent) and municipal officials, e.g. from the PMU responsible for the MIG projects.

Report must relate to the status and progress of the following:

- Awareness and preparation of municipal council and management
- Relevant LIC training - all levels, all relevant persons
- Identification and selection of project and required approvals – including for MIG programme
- Preparation of community liaison and facilitation - and obtaining information required for the design work
- Appointment of municipal PSP's
- Construction training to labourers
- General project characteristics, challenges, successes, new ideas, good practices and solutions of problems

3. **Monthly Municipal Progress Reports** must include the biweekly reports and updated information, and approved by the members of the municipal PSC.

The municipal PSC is already created in terms of the MISA MOA with the particular municipality.

The relevant MISA colleagues, who are tasked with the projects of the targeted municipality, must do inspection and verify progress. The report should include inputs from the relevant colleagues from the Municipality, Provincial Departments and municipal PSP's after their appointments.

Report must relate to the same as the bi-weekly report and must add the following:

- Progress of the design work of the municipal consulting engineer
- Progress of the construction work and supervision of the labourers
- Physical and financial progress
- Compilation of all lessons learnt, good LIC-specific methods and practices - to share with the PSC.

4. **Monthly Programme Management Progress Reports** must be compiled by the Management Consultant and must include at least the following:

- Progress of all programme activities of management consultant and all sub-consultants (if applicable), compared to the initial planned timeframe i.e.:
  - Updated Task list highlighting any additional tasks and requirements
  - Highlighting any challenges and possible actions to resolve them
  - Implementation planning and progress on deliverables
  - LIC Training
  - LIC Project Implementation
  - Upgrading of LIC and EPWP Reporting System
- Services of other PSP's related to the LIC Capacity Building Programme
- Good practice report summary to be shared with Research Team at PSC meeting, i.e.

compilation of all lessons learnt from institutional arrangements and management aspects added to Monthly Municipal Progress Report lessons learnt. Describe all capturing, sharing of data, information knowledge of lessons learnt, recommendations related to norms, standards, methods and practices.

- Capacity Building Progress including:
  - The planned exit strategy and handover to the existing client structures especially Department of Public Works, EPWP programme, DCOG, MISA and municipalities – in order to carry on with a sustainable process to mainstream LIC at municipalities, implement items for improvement and reporting management and M&E.
  - hand-over of inputs for the updating of policy, procedures, guidelines and recommendations - with reference to all levels of stakeholders / role players of LIC

5. **Quarterly Programme Management Progress Reports** - which must be a summary of the monthly progress reports. Dates and formats for submission will be confirmed later.

### C3.8 CONTRACT AND PROJECT IMPLEMENTATION PLAN

The contract will be based on NEC 3 (April 2013) Professional Services Contract (PSC).

The contract shall be signed by all parties within 2 weeks after appointment of the service provider. Prior to signing of the contract, the service provider has to prepare and submit a project implementation plan (PIP) for approval by MISA using an agreed template. The PIP will form part of the contract.
